TRENDS IN NEUROSCIENCES

REFERENCE EDITION

Volume 10

1987

CONTENTS

JANUARY

Research News

Binocular depth vision in arthropods, *by T. S. Collett* 1

Patterns, puzzles and paradigms: the riddle of the homeobox, *by Paul N. Scofield* 3

Vascular factors in the causation of diabetic neuropathy, *by P. K. Thomas* 6

Viewpoint

Cortical spreading depression as a putative migraine mechanism, *by Martin Lauritzen* 8

Perspectives

Selective attention and cognitive control, *by Michael I. Posner and David E. Presti* 13

Possible biological correlates of precocious mathematical reasoning ability, *by Camilla Persson Benbow* 17

Letter to the Editor

Problems with peptides, *by J. W. van Nispen* 22

More on receptor mismatch, *by Tomas Hökfelt and Lars Terenius* 22

Reviews

Patterns of cell loss in Huntington's disease*, *by Neil W. Kowall, Robert J. Ferrante and Joseph B. Martin* 24

The role of protein kinase C in the regulation of ion channels and neurotransmitter release, *by Leonard K. Kaczmarek* 30

Transmitters, membrane properties and network circuitry in the control of locomotion in lamprey, *by Sten Grillner, Peter Wallén, Nicholas Dale, Lennart Brodin, James Buchanan and Russell Hill* 34

Synaptic efficacy and the control of neuronal input–output relations, *by R. E. Burke* 42

Neuropeptides in identified *Aplysia* neurons: precursor structure, biosynthesis and physiological actions, *by Richard H. Scheller and Mark D. Kirk* 46

FEBRUARY

Research News

Nucleotide binding proteins in signal transduction and disease, *by A. C. Dolphin* 53

Phorbol esters: probes of protein kinase C function in the brain, *by Jay M. Baraban* 57

Cellular mechanisms underlying excitotoxicity, *by Mark L. Mayer and Gary L. Westbrook* 59

What does phosphorylation do for the nicotinic acetylcholine receptor? *by Joe Henry Steinbach and John Zempel* 61

Viewpoint

Glutamate dysfunction in Alzheimer's disease: an hypothesis, *by William F. Maragos, J. Timothy Greenamyre, John B. Penney, Jr and Anne B. Young* 65

Perspectives on disease

The pathophysiology of myoclonus, *by Mark Hallett* 69

Letter to the Editor

The amphibian lateral line system, *by Bernd Fritzsch* 74

Amino acid receptor nomenclature, *by Trevor W. Stone* 74

* See errata

Reviews
Arginine vasopressin: a novel peptide rhythm in cerebrospinal fluid, *by Steven M. Reppert, William J. Schwartz and George R. Uhl* 76
Roles for perceived voluntary motor commands in motor control, *by S. C. Gandevia* 81
Histamine neuronal pathways and their functions, *by Hélène Pollard and Jean-Charles Schwartz* 86
Cerebral vasospasm after subarachnoid hemorrhage, *by Kevin J. Kiwak and Roberto C. Heros* 89
The structure of acetylcholinesterase: relationship to its function and cellular disposition, *by Palmer Taylor, Mark Schumacher, Kathleen MacPhee-Quigley, Theodore Friedmann and Susan Taylor* 93

Books
Model Neural Networks and Behavior (edited by Allen Selverston), *by R. K. Murphey* 95
Elements of the Scientific Paper (by Michael J. Katz), *by D. W. Hukins* 96
The Case for Animal Experimentation: An Evolutionary and Ethical Perspective (by Michael Allen Fox), *by Marian Stamp Dawkins* 97

MARCH

Research News
Three of a kind: the β-adrenergic receptor, the muscarinic acetylcholine receptor, and rhodopsin*, *by Zach W. Hall* 99

Techniques
Using the brain to screen cloned genes, *by Gail Mandel and Richard H. Goodman* 101

Perspectives
The status of the UK in world science, *by Georgina Ferry* 105

Letter to the Editor
The insect neuronal nAChR: a homo-oligomer or not? *by A. Maelicke* 107
Reply from G. G. Lunt 107

Reviews
Hard lessons in motor control from the mammalian spinal cord, *by Gerald E. Loeb* 108
Biology and structure of the mammalian glycine receptor, *by Heinrich Betz* 113
Ultrastructure and synaptic connections of cutaneous afferent fibres in the spinal cord, *by D. J. Maxwell and M. Réthelyi* 117
Predictions for neural control based on limb dynamics, *by Judith L. Smith and Ronald F. Zernicke* 123
The GnRH family of peptides, *by Nancy Sherwood* 129

Books
Ionic Currents in Development (Progress in Clinical and Biological Research, Vol. 210) (edited by Richard Nuccitelli), *by C. D. Stern* 133
Single Cell Marking and Cell Lineage in Animal Development (edited by R. L. Gardner and P. A. Lawrence), *by Seth S. Blair* 133
The Molecular Biology of Development (Cold Spring Harbor Symposia on Quantitative Biology, Vol. L), *by Jonathan Slack* 134

APRIL

Research News
Schwann cells during neural development and regeneration: leaders or followers?, *by Roger J. Keynes* 137
Insect maps, *by T. S. Collett* 139
Progress on LTP at hippocampal synapses: a post-synaptic Ca^{2+} trigger for memory storage?, *by Stephen J. Smith* 142

Viewpoint
On telling your fruit from your vegetables: a consideration of category-specific deficits after brain damage, *by Glyn W. Humphreys and M. Jane Riddoch* 145

Perspectives on Disease
The molecular biology of scrapie: the last two years, *by James Hope and Richard H. Kimberlin* 149

Letter to the Editor
Schizophrenic people or schizophrenic brains?, *by Steven Rose* 152

Reviews
Visual stabilization of the eyes, *by F. A. Miles and K. Kawano* 153
Galanin: a newly isolated biologically active neuropeptide*, *by Åke Rökaeus* 158
Neuronal calcium homeostasis, *by R. N. McBurney and I. R. Neering* 164
Moving gracefully: quantitative theories of motor coordination, *by Neville Hogan and Tamar Flash* 170
The vesicular acetylcholine transport system, *by Ian G. Marshall and Stanley M. Parsons* 174

Books
Spinal Afferent Processing (edited by Tony L. Yaksh), *by P. D. Wall* 177
Molecular Cell Biology (by James Darnell, Harvey Lodish and David Baltimore), *by Judith P. Armitage* 178
Hypothalamic Control of Pituitary Functions: The Growth Hormone Releasing Factor (by Roger Guillemin), *by I. C. A. F. Robinson* 179

MAY

Research News
Deciphering Alzheimer's disease: the pace quickens, *by Dennis J. Selkoe* 181
Benzodiazepines in the brain, *by F. Anne Stephenson* 185
Putting together the neuronal cytoskeleton, *by Andrew Matus* 186

Viewpoint
The influence of neuronal activity on patterns of synaptic connections, *by Eric Frank* 188

Perspectives on Disease
Cystic fibrosis: a disease of ion channels?, *by Raymond A. Frizzell* 190
Heterogeneity in Alzheimer's disease: epidemiological and family studies, *by D. W. K. Kay* 194

Letter to the Editor
Is brain research dead?, *by David Rose* 196
How different are male and female brains?, *comments from P. Södersten and from William Byne and Ruth Bleier* 197
Reply from Darcy Kelley 199

Reviews
New directions in neurotransmitter action: dopamine provides some important clues, *by Michael A. Rogawski* 200
Axonal bifurcation in the visual system*, *by Jean Bullier and Henry Kennedy* 205
Molecular bases of the immune response to neural antigens, *by Lois A. Lampson* 211

Books
An Introduction to the Mathematics of Neurons (by F. C. Hoppensteadt), *by Edwin R. Lewis* 216

Books in Brief
Foundations of Developmental Genetics (by D. J. Pritchard), *by C. Tickle* 217
A Clinician's View of Neuromuscular Diseases (edited by Michael H. Brooke), *by G. Karpati* 217

Books Received 217

JUNE

Research News
Cell lineage and the origin of muscle fiber types, *by Joshua R. Sanes* 219
Sodium channel diversity: subtle variations on a complex theme, *by Robert L. Barchi* 221
Is RO 15-4513 a specific alcohol antagonist?, *by Richard G. Lister and David J. Nutt* 223
Bradykinin highlights the role of phospholipid metabolism in the control of nerve excitability, *by Richard J. Miller* 226
Putting genes into hypogonadal mice, *by H. M. Charlton* 229

Perspectives
The 1986 Nobel Prize in Physiology or Medicine, *by Dale Purves and Joshua R. Sanes* 231
Neuroscience and the private sector: a necessary alliance, *by Nancy S. Wexler* 235
Directory of non-federal neuroscience funding sources in the United States, *by Katherine Bick* 238

Reviews
G proteins as regulators of ion channel function, *by Kathleen Dunlap, George G. Holz and Stanley G. Rane* 241
The acetylcholine receptor molecule: allosteric sites and the ion channel, *by Jean-Pierre Changeux and Frédéric Revah* 245
Localization of amino acid neurotransmitters by immunocytochemistry, *by Ole P. Ottersen and Jon Storm-Mathisen* 250
GABA as an autonomic neurotransmitter: studies on intrinsic GABAergic neurons in the myenteric plexus of the gut, *by K. R. Jessen, R. Mirsky and J. M. Hills* 255

JULY

Special Issue

Introduction
Excitatory amino acids in the brain – focus on NMDA receptors, *by C. W. Cotman and L. L. Iversen* 263

Reviews
Agonists and antagonists for excitatory amino acid receptors, *by J. C. Watkins and H. J. Olverman* 265
Anatomical organization of excitatory amino acid receptors and their pathways, *by Carl W. Cotman, Daniel T. Monaghan, Ole P. Ottersen and Jon Storm-Mathisen* 273
Receptors, ion channels and synaptic potentials underlying the integrative actions of excitatory amino acids, *by Amy B. MacDermott and Nicholas Dale* 280
Electrophysiological studies of NMDA receptors, *by Philippe Ascher and Linda Nowak* 284
NMDA receptors – their role in long-term potentiation, *by G. L. Collingridge and T. V. P. Bliss* 288
Non-competitive antagonists of excitatory amino acid receptors, *by John A. Kemp, Alan C. Foster and Erik H. F. Wong* 294
Excitotoxicity and the NMDA receptor, *by Steven M. Rothman and John W. Olney* 299

AUGUST

Research News
Retroviruses as tools for the study of cell lineage in mammals, *by Karl Herrup* 303
Computational models and the development of topographic projections, *by Terrence J. Sejnowski* 304

Perspectives
Alois Alzheimer: a memoir, *by Myfanwy Thomas and Michael Isaac* 306

Techniques
Recent progress in receptor mapping: which neurons contain the receptors?, *by Michael J. Kuhar* 308

Letter to the Editor
Point images, receptive fields, and retinotopic mapping, *by Hanspeter A. Mallot* 310

Reviews
Sensory and motor maps in the mammalian superior colliculus, *by David L. Sparks and Jon S. Nelson* 312
The ion channel of the nicotinic acetylcholine receptor, *by H. Robert Guy and Ferdinand Hucho* 318
Structure of cytoplasm as revealed by modern electron microscopy techniques, *by Paul Bridgman* 321
What muscle cells know that nerves don't tell them, *by Jeffrey Boone Miller and Frank E. Stockdale* 325
Drosophila learning and memory revisited, *by Tim Tully* 330
Nucleotides such as ATP may control the activity of ion channels, *by P. R. Stanfield* 335

Books Received 339

SEPTEMBER

Research News

Androgens can affect the morphology of mammalian CNS neurons in adulthood, *by T. J. DeVoogd* 341
Function of the locus coeruleus, *by Clifford B. Saper* 343
Pain and analgesia in neonates, *by Maria Fitzgerald* 344

Viewpoint

Glucocorticoids and hippocampal damage, *by Robert M. Sapolsky* 346

Perspectives

Tatsuji Inouye and the mapping of the visual fields on the human cerebral cortex, *by Mitchell Glickstein and David Whitteridge* 350

Tribute

Graham Goddard (1938–1987), *by Ronald J. Racine* 354

Letter to the Editor

Receptor–G protein precoupling: neither proven nor needed, *by Marc Chabre* 355
Reply from Annette Dolphin 356

Reviews

Visual neurones responsive to faces, *by David I. Perrett, Amanda J. Mistlin and Andrew J. Chitty* 358
The aneurogenic limb: a puzzle in cell interactions, *by Donna M. Fekete and Jeremy P. Brockes* 364
Neuromodulators and respiratory control during development, *by Hugo Lagercrantz* 368
Control of ionic currents and fluid secretion by muscarinic agonists in exocrine glands, *by A. Marty* 373
Dopaminergic regulation of protein phosphorylation in the striatum: DARPP-32, *by Hugh C. Hemmings, Jr, S. Ivar Walaas, Charles C. Ouimet and Paul Greengard* 377

Books

Control of Human Voluntary Movement (by John C. Rothwell), *by Robert E. Burke* 383
Can Schizophrenia be Localized in the Brain? (edited by Nancy C. Andreasen), *by Angus V. P. Mackay* 384
Philosophy and the Brain (by J. Z. Young), *by David Rose* 384
The Cytoskeleton: Cell Function and Organization (edited by C. W. Lloyd, J. S. Hyams and R. M. Warn), *by Paul C. Letourneau* 385

OCTOBER

Research News

Stretch-activated ion channels in bacteria and animal cell membranes, *by Richard Kullberg* 387
Curing the *shiverer* mutant, *by Robert J. Milner* 388
What happens when growth cones meet neurites: attraction or repulsion?, *by Paul C. Letourneau* 390

Perspectives on Disease

Motor neuron diseases and amyotrophic lateral sclerosis: research progress, *by Lewis P. Rowland* 393

Techniques

Imaging mammalian nerve cells and their connections over time in living animals, *by Dale Purves and James T. Voyvodic* 398

Letter to the Editor

Neuropathology of Huntington's disease, *by G. P. Reynolds and S. J. Pearson* 404
Reply from Neil Kowall and colleagues 404
Glutamate neurotoxicity and Alzheimer's disease, *by John Hardy and Richard Cowburn* 406
Reply from W. F. Maragos and colleagues* 407

Reviews
Hippocampal synaptic enhancement and information storage within a distributed memory system, *by B. L. McNaughton and R. G. M. Morris* 408
Hormone-mediated plasticity in the electrosensory system of weakly electric fish, *by Harold H. Zakon* 416
Electrical tuning of hair cells in the inner ear, *by Robert Fettiplace* 421
Oxytocin-secreting neurones: a physiological model for structural plasticity in the adult mammalian brain, *by Dionysia T. Theodosis and Dominique A. Poulain* 426
Growth cones: do they pull or are they pushed?, *by Dennis Bray* 431
Plasticity of olfactory output circuits related to early olfactory learning, *by Michael Leon* 434

Books
The Rat Brain in Stereotaxic Coordinates (2nd edn) (by George Paxinos and Charles Watson), *by James P. Herman and Stanley J. Watson* 439
Blindsight: A Case Study and Implications (by L. Weiskrantz), *by Matthew Rizzo* 439
Comparative Neurobiology of the Basal Ganglia (by André Parent), *by Anton Reiner* 440

Books Received 441

NOVEMBER

Research News
Glial cells and the formation of invisible boundaries in development (or, peanut barrels in the brain), *by Karl Herrup* 443
Classification and nomenclature of phencyclidine and sigma receptor sites, *by Rémi Quirion, Robert Chicheportiche, Patricia Contreras, Kenneth M. Johnson, David Lodge, S. William Tam, James H. Woods and Stephen R. Zukin* 444
Overcoming barriers to exocytosis, *by Adam D. Linstedt and Regis B. Kelly* 446
Functional fractionation of frontal fields, *by Steven P. Wise and Moshe Godschalk* 449

Perspectives
Reminiscences on the sodium pump, *by Robert B. Dean* 451

Perspectives on Disease
Host and viral factors that influence viral neurotropism I. Viral cell attachment proteins and target cell receptors, *by Kenneth L. Tyler* 455

Letter to the Editor
Neuronal calcium, *by Robert D. Burgoyne* 460

Reviews
The search for novel anxiolytics, *by Sandra E. File* 461
Calcium-activated potassium channels*, *by A. L. Blatz and K. L. Magleby* 463
The development of skin sensory innervation patterns, *by Sheryl A. Scott* 468
Mechanisms of trans-synaptic regulation of gene expression, *by Michael Comb, Steven E. Hyman and Howard M. Goodman* 473
Form and function in retinal processing, *by Simon B. Laughlin* 478

Books
Selective Neuronal Death (edited by Gregory Bock and Maeve O'Connor), *by Peter G. H. Clarke* 483
Venoms of the Hymenoptera (edited by Tom Piek), *by Hunter Jackson* 484

Books in Brief
Annual Review of Neuroscience (Vol. 10) (edited by W. Maxwell Cowan, Eric M. Shooter, Charles F. Stevens and Richard F. Thompson) 485
Monoaminergic Neurons: Light Microscopy and Ultrastructure (edited by Harry W. M. Steinbusch), *by Marianne Fillenz* 485
Voltametry in the Neurosciences (edited by Joseph B. Justice, Jr), *by J. Millar* 485

DECEMBER

Viewpoint

Neuronal connections underlying orientation selectivity in cat visual cortex, *by David Fester and Christof Koch* 487

Perspectives on Disease

Host and viral factors that influence viral neurotropism II. Viral genes, host genes, site of entry and route of spread of virus, *by Kenneth L. Tyler* 492

Letter to the Editor

Quantifying receptor autoradiography, *by Michael Dashwood* 497

Reviews

Magnocellular neuroendocrine neurons: update on intrinsic properties, synaptic inputs and neuropharmacology, *by Leo P. Renaud* 498

Molecular biology of the $GABA_A$ receptor: the receptor/channel superfamily, *by Eric A. Barnard, Mark G. Darlison and Peter Seeburg* 502

Mechanisms of action of intracerebral neural implants: studies on nigral and striatal grafts to the lesioned striatum, *by Anders Björklund, Olle Lindvall, Ole Isacson, Patrik Brundin, Klas Wictorin, Robert E. Strecker, Deborah J. Clarke and Stephen B. Dunnett* 509

Sexual differentiation in birds, *by Elizabeth Adkins-Regan* 517

Molecular biology of the voltage-gated sodium channel, *by Lawrence Salkoff, Alice Butler, Aguan Wei, Nancy Scavarda, Keith Baker, David Pauron and Cynthia Smith* 522

A membrane phosphoprotein associated with neural development, axonal regeneration, phospholipid metabolism, and synaptic plasticity, *by Larry I. Benowitz and Aryeh Routtenberg* 527

Books

Working Memory (by Alan Baddeley), *by A. P. Shimamura* 532

Basic Methods in Molecular Biology (by L. G. Davis, M. D. Dibner and J. F. Battey), *by Huntington Potter* 533

ERRATA

Three of a kind: the β-adrenergic receptor, the muscarinic acetylcholine receptor, and rhodopsin, *by Zach W. Hall* (March, pp. 99–101) 199

Patterns of cell loss in Huntington's disease, *by Neil W. Kowall, Robert J. Ferrante and Joseph B. Martin* (January, pp. 24–29) 317

Axonal bifurcation in the visual system, *by Jean Bullier and Henry Kennedy* (May, pp. 205–210) 317

Galanin: a newly isolated biologically active neuropeptide, *by Åke Rökaeus* (April, pp. 158–164) 407

Calcium-activated potassium channels, *by A. L. Blatz and K. L. Magleby* (November, pp. 463–467) 516

Glutamate neurotoxicity and Alzheimer's disease – reply from W. F. Maragos and colleagues (October, p. 407): In the first sentence of the third paragraph, the word *no* should be deleted.
